...strong health

Project summary

This multidisciplinary and comparative Joint Exchange programme will identify and examine how nutritional labeling in European countries and out of Europe can influence on health and welfare of population. Health professionals agree that the relationship between diet and health is important. Our eating habits can help or hurt our overall health and well-being. Good eating habits include being a smart shopper and selecting foods that reflect the **Dietary Guidelines**. The food label was designed to help people choose foods for a healthful diet. By using the **food label**, we can compare the nutrient content of similar foods, see how foods fit into our overall diets, and understand the relationship between certain nutrients and diseases.

Experienta in cadrul proiectului NUTRILAB

Tips and tricks

- Nu ezitati sa participati la evenimente stiintifice si de formare
- Cand mergeti la evenimente la Bruxelles – anuntati MOST. Veniti la oficiu, discutati cu seful oficiului Sergiu Porcescu.
- Deranjati NCPs, RO si EN din domeniu din RM, si din afara tarii.
- La evenimente internationale nu comunicati numai cu colegi din RM si Romania, inclusiv si la coffee break!!! Daca este preconizata o reuniune non-formala in ajunul evenimentului – incercati sa fiti prezenti. Acolo sunt cristalizate idei si consortii!
- Colaborarea in cadrul proiectelor internationale, la etape de elaborare necesita implicarea timpului si finantelor, foarte des finantelor personale – care nu sunt incluse in buget, si nu pot fi rambursate.

Va multumesc pentru atentie, va doresc sanatate!
